Task Completed

Check and Clean Stairs
has been completed by Jodie.

Our industry-leading EVS staffing software is the basis for a clean hospital.

THREE SOFTWARE PRODUCTS THAT REVOLUTIONIZE CLEAN

Run by mobile managers
and a happier, connected staff.

**Justify Staffing. Balance Work Assignments.
Improve Performance. Report Progress.**

**Trade hours in spreadsheets for minutes in
ES Optimizer to optimize your workflow.**

Staffing and Room Inventory • Daily Work Assignments •
Schedule Project Work • Days-On/Days-Off • Census-Based
Scheduling • Manage Employee Training • QA Inspections • Reporting

**Mobile Service Requests.
Digital Work Assignments. Real-Time Dashboard.**

**Add this mobile companion to ES Optimizer.
Assign tasks and track progress in real time with
cloud-based task management technology.**

Digital Daily Task Lists • Assign Scheduled and Non-Scheduled Tasks •
Technicians Log Completed Work • Management Can Track Progress
in Real Time • QR Code Scan and Texting Capabilities

Any Survey. Anytime. Anywhere.

**Compile data from multiple locations as
it's collected. Electronically document steps
taken during isolation cleans.**

Web-Based • Easy Data Entry • Convenient Templates •
Seamless Across Your Enterprise • Flexible User Management •
Multiple Scoring Options • Turnkey Assistance

Staffing

Get the right number of people.

Accurate Database of Your Unique Facility Cleaning Data

ES Optimizer inventories every cleanable space of your facility and assigns vital cleaning metrics to each room. Easily view and adjust cleaning times and task frequencies.

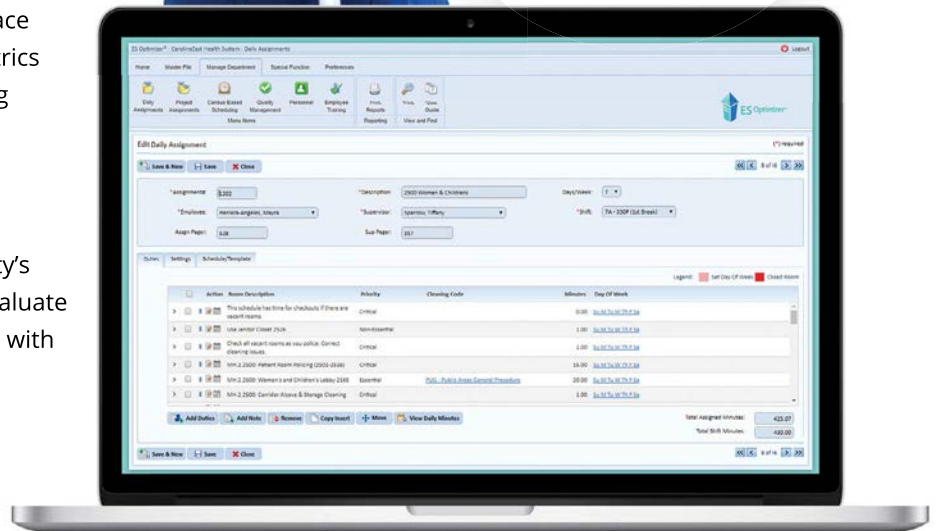

Staffing Analysis & Reports

Create staffing analyses based on your facility's unique data, justify staffing requests, and evaluate proposed changes to your cleaning program with detailed, data-driven reports.

↓ 98%

Reduction in labor cost to create new work assignments.

Assignments & Scheduling

Make sure your team knows what to do.

Daily Assignments

ES Optimizer calculates cleaning time for each assignment as you build it. Create balanced, standardized, and easy-to-read work assignments, and combine them to build short staff assignments.

Census-Based Scheduling

Get snapshots of patient room assignment workloads at the start of each day. Set discharge quotas for each assignment based on the day's census and analyze and report on productivity results.

Project Work

Stop dropping scheduled work to put out fires. Create project assignments and work orders on the fly, schedule project work on a daily calendar, know when projects are complete, and create reports.

Days On/Off Scheduling

Ensure all work assignments are covered at a glance. See availability from one week to ten weeks out, schedule PTO while seeing holes in the roster, and run attendance reports with specific PTO data by employee.

Dashboards & Reporting

Gain the most from your budget.

Customizable Dashboards to View Any Data

View pre-built dashboards or customize your own to visualize and place your most important real-time data at your fingertips.

Reports Generated

Generate detailed reports on room inventory based on real-time data, or create survey results reports as soon as a survey is completed.

REPORT ON ROOM INVENTORY IN MULTIPLE WAYS:

Cleaning Data • Employee Training Reports • Export Daily Work Assignments • Productivity Reporting • Project Work Orders • Cleaning Compliance • Cleaning History & Policing History by Date and Time

Training & QA

Continued performance improvement.

Manage Training Effectiveness

Employee Training

Schedule, document, and manage employee training. Choose from over 50 standardized classes or create your own, schedule classes in advance, and report on completed classes, attendance, and scores.

Mobile Training Management

Schedule training and document attendance and scores on the mobile app. The mobile app also accepts employee signatures.

Eliminate Paper and Data Re-Entry

Mobile QA Inspections

Create inspections based on daily assignments and conduct cleaning inspections in the field with our mobile app. No real-time internet connection is required for data collection, and data automatically syncs to the cloud-based ES Optimizer database.

Customize the scoring system and attach pictures and comments to each inspection step. Access over 40 customizable inspection results reports.

Mobile Team Communications

Put your entire EVS team in direct contact.

Mobile Daily Assignments & Policing Assignments

Drop paper checklists and assignments, and document daily and project cleaning on mobile devices instead. Technicians can mark tasks as complete as they go.

Mobile Task Management

Schedule, assign, and reassign tasks to team members from your mobile device to theirs. Technicians and managers can log and inspect project work with their mobile devices.

Mobile Communications App

Connected Team with One Communications App

A single texting platform lets you communicate from web-to-mobile, mobile-to-mobile, and mobile-to-web, eliminating the need for EVS cell phones, pagers, and games of phone tag.

Mobile Service Requests

Any customer can submit mobile service requests by scanning uniquely-generated QR code signage in high-traffic areas. Requests are automatically logged in the database and sent to the designated manager, who assigns it to a technician.
