

Get true **EVS** visibility.

ES Optimizer™

Assignments & Scheduling

Your team knows
what to do.

TRADE HOURS IN SPREADSHEETS
FOR MINUTES IN ES OPTIMIZER

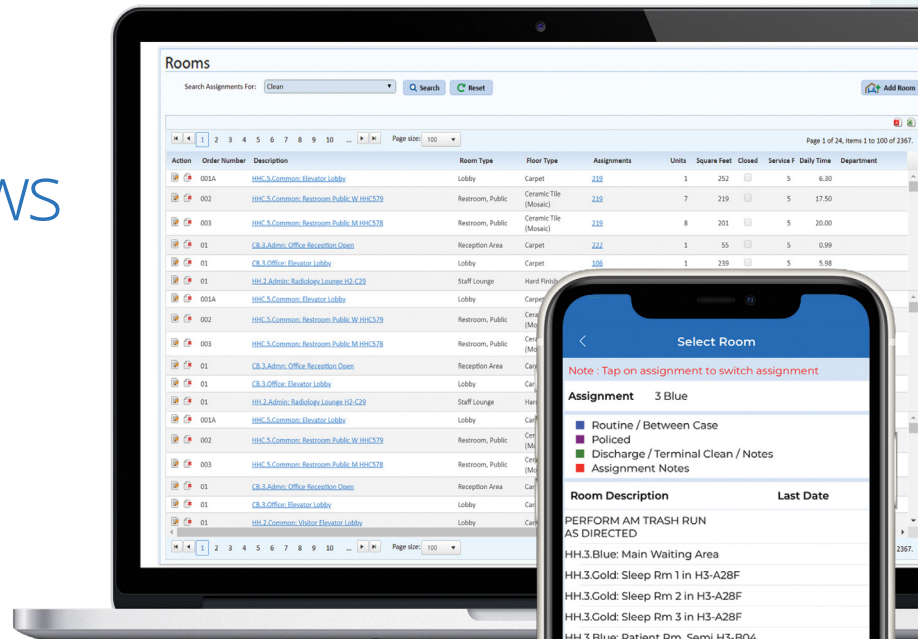

Daily Assignments

Create balanced, standardized, and easy-to-read work assignments. Manage them as resources change.

- The software calculates cleaning time in each assignment as you build it.
- Multiple capabilities filter tasks by frequency, room type, and location.
- Drag and drop rooms to put cleaning sequences in order.
- Automatic insertion of breaks based on cleaning-time totals.
- Choose from different work assignment formats for employees and managers.
- Combine assignments to build short staff assignments when absenteeism creates staffing challenges.

Census-Based Scheduling

Import census data daily to get a snapshot of patient room workloads. Set discharge quotas and add project work to accurately analyze productivity.

Days On/Off Scheduling

- Easy to ensure all work assignments are covered at a glance.
- Build a custom master template from your work assignments.
- Drop-down menus show daily availability from one to ten weeks out.
- Apply the master template across calendar dates with one click.
- Schedule PTO while seeing any holes in the roster.
- Print daily sign-in sheets and post schedules by employee and assignment.
- Run attendance reports with specific PTO data by employee.

Project Work

Stop dropping scheduled work to put out fires: Schedule project work on a daily calendar or add it as you see the need — right in the mobile app. Track scheduled projects vs completed. Choose from default project frequencies or customize them.

Take your
EVS visibility
to the next level,
on every level.

THREE SOFTWARE PRODUCTS
LET YOU TAILOR YOUR VISIBILITY LEVEL

Visibility
begins here.

Visible, real-time
communications.

Advanced surveys
& inspection.
