

Get true **EVS visibility.**

ES Optimizer™

Mobile QA Inspections

Eliminate paper and data re-entry.

CONDUCT MOBILE QA INSPECTIONS IN THE FIELD WITH OUR MOBILE APP

Easier, quicker QA results.

ES Optimizer's revolutionary Quality Management module means inspections can be conducted on a mobile app — completely eliminating data re-entry, and producing instant reports and results.

Based on daily assignments.

Once a room is selected for QA, it shows up in your inspection list. Each inspection is automatically populated with the cleaning steps for that room. Monitor quality step-by-step and get a clear picture of areas where your team requires more training.

- Select rooms for inspection by assignment, floor, department, and more.
- Create inspections of specific rooms or randomly chosen rooms.
- Customize the scoring system.
- Attach pictures and comments to each inspection step, if desired.
- Track a history of inspections for a room.
- Access over 40 customizable reports.
- No real-time internet connection required for data collection.
- Data syncs over the cloud to the ES Optimizer database — no secondary processes or data entry needed.

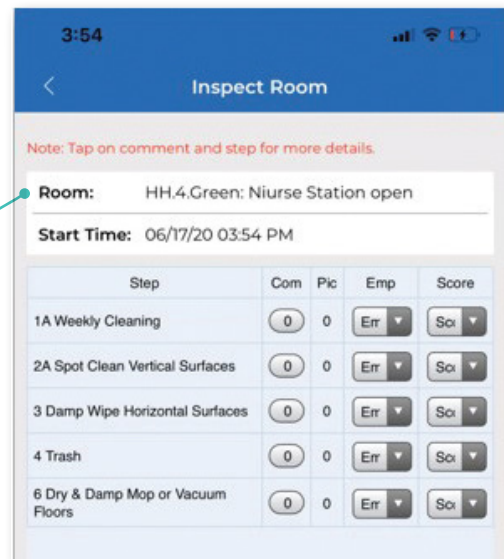

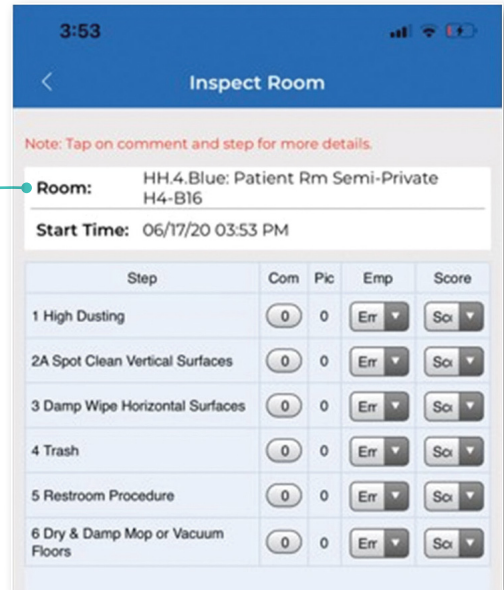

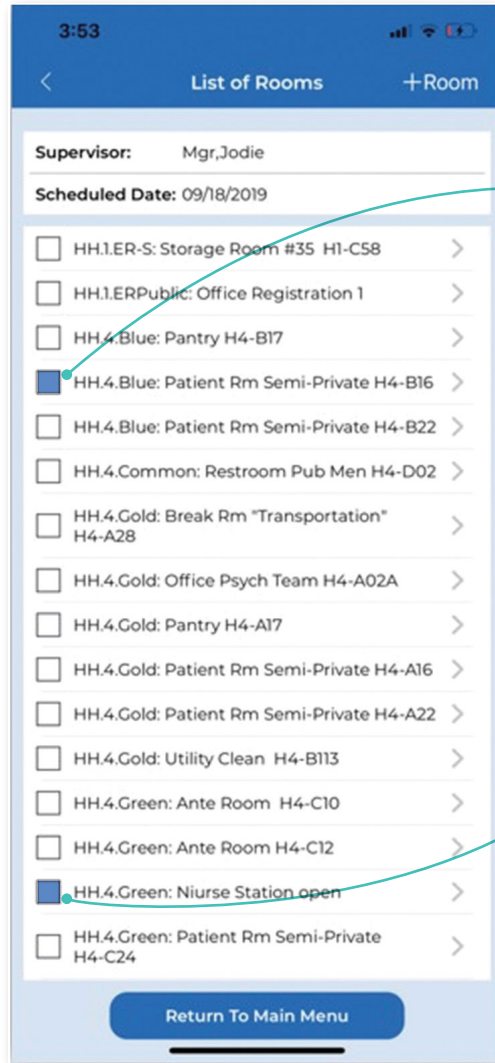

THE INDUSTRY STANDARD FOR ENVIRONMENTAL SERVICES

ON REVERSE:
Inspection List of Rooms and Cleaning Steps by Room

Sample inspection screens

Each room in the inspection list is automatically populated with the cleaning steps for that room. You can monitor quality step-by-step and track a history of inspections by building, floor, subsection, or team member.

Increase **your** EVS visibility.
